

GEARMATE

Cable Tester and Tracker for RJ11 and RJ45

Part: PITS-TP-2, UPC#: 091324407286

This cable tester allows you to verify RJ11 and RJ45 cables by performing wiremapping (continuity test). It includes a probe that checks and find cables among a bundle of many, useful for situations where a certain wire needs to be traced. Other features include checking for open circuits, shorts, and crosses. The cable tester includes a RJ11 port for testing telephone lines, alligator clips for testing wires, and RJ45 ports for testing RJ45 ethernet cables. Earphones are included for use in noisy environments.

Features

- Check and find cables among a bundle of many
- Traces UTP/STP RJ45, RJ11 and metal cables
- Wiremap (Continuity test) for LAN cables
- Checks for open circuits, short circuits and cross cables
- Visible indication: pin-to-pin cable map for individual cables (not by pairs)
- Low voltage indicator
- LED for low-light conditions
- Deluxe black faux-leather carrying bag included
- Uses 2 x 9V batteries (not included)

Transmitter Specifications	
Tone Frequency	200Hz
Distance of Transmission (max)	6,562ft (2km)
Working Current (max)	≤10mA
Volume Regulate Function	Audio volume level control
Tone Mode	2 Tone, Adjustable
Compatible Connectors	RJ45, Cable Clip with RJ11 Connector
Signal Voltage (max)	8 vp-p
LED Light Display	Wiremap, Tone, Tracing
Voltage Protection	AC 60V/DC 42V
Battery Type	DC 9V
Dimension (LxWxD)	150 x 37 x 23mm

Receiver Specifications

Frequency	200kHz
Working Current (max)	≤30mA
Earphone Jack	1
Battery Type	DC 9V
Dimension (LxWxD)	122 x 45 x 23mm

What's Included

Transmitter	1pc
Receiver	1pc
Earphone	1pc
Adapted Network Cable	1pc
Clip	1pc
User Manual	1pc
Carrying Case	1pc
